# **Assignment**

1. Installing node latest version and npm

2. Read file asynchronously and synchronously.

### **Asynchronously**

```
const http=require('http');
const fs =require('fs');

http.createServer((request,response)=>{
    fs.readFile('Demo.html',(err,data)=>{
        response.writeHead(200,{'Content-Type':'text/html'});
response.write(data);
response.end();
    });
```

```
}).listen(3000);
console.log("file read success")
```

#### Sychronously

```
const http=require('http');
const fs =require('fs');

http.createServer(function(request,response){
        const data=fs.readFileSync('Demo.html');
response.writeHead(200, {'Content-Type':'text/html'});
response.write(data);
response.end();

}).listen(3000);

Demo.html

<h1> hello world</h1</pre>
```

### 3. Install dependencies and dev dependencies

>npm install cors --save-dev

Package.json

### 4. Creating module and import & export

#### <u>4.js</u>

```
exports.add=((a,b)=>{
    return a+b;
})

Server.js

const http=require('http');
const add =require('./4');

http.createServer(function(request, response) {
//var val=add(1,2);
response.writeHead(200, {'Content-Type':'text/html'});
console.log("sum is",add.add(2,3));

response.end();
```

```
}).listen(3000);
```

## 5. Creating a http server

```
var http = require('http');
http.createServer(function (req, res) {
  res.write('Hello World!');
  res.end();
}).listen(3000);
```

Hello World!
